

Allestree. 1630.

A New Almanack and Prognostication,
for the years
of our Lord God,

And from the creation. 5592
Being the second fro Leap year

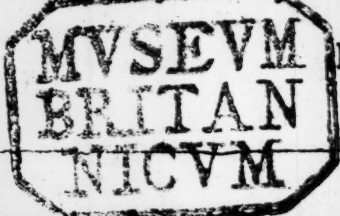

Celestiall and properly re-
ferred to the longitude &
subtinty of the Pole
Arctike of 41 deg. 32 m.

Mutor pro temporis ratione.
By Richard Allestree

London Printed for the Com-
pany of Stationers.

*Ad amicum suum charissimum M. R. Allestree
de Libro hoc Prognostico.*

*Abdita stelliferi referans mysteria Caeli,
quid signent nobis astra cornuta Poli,
Quid pluvias, Ventos, tempestatesque sonoras
excitet, his pulsus undè serena dies,
Illas à pietate, doces; namquè omnibus istis
~~Causas Causarum~~ tu facis esse Deum.*

R.W.

Vpon what dayes the Fayres of the Barrow of
Dorby are to be kept this present yeare,
1630. as followeth.

- T**He first is vpon Friday in Easter weeke
2. The fourth and fift daies of May.
3. The Friday in Whitson weeke.
4. The 18. day of Iune, being Friday.
5. The 26. of Iuly, being Munday.
6. The 27, and 28. daies of September.

A necessarie and perfect rule for ever, to know when
the 4 Termes begin and end: and how many
Returnes are in euery Terme.

Eight daies before a Terme shall be,
The Exchequer openeth certainly:
Except the Terme of Trinity,
Which openeth but foure daies before assuredly.

1. Hilary Terme beginneth the 23 of January, (if it be
not Sunday) but then the next day after: and endeth the 12
of February: and hath 4 Returnes.

Ostabis Hillarii	Craftino Purificationis
Quind. Hillarii	Ostabis Purificationis

2. Easter Terme beginneth 17 dayes after Easter, and
endeth 4 dayes after Wicentton day: and hath 5 Returnes.

Quind. Pasche	Mense	Quind. Pasche
Tres Pasche	Pasche	Craftino Ascensionis

3. Trinity Terme beginneth the next day alwayes after
Corpus Christi day, & endeth the Wednesday fo: night after:
and hath 4 Returnes. Note that Corpus Christi day is al-
wayes the Thursday after Trinity Sunday.

Craftino Trinitatis	Quind. Trinitatis
Ostabis Trinitatis	Tres Trinitatis

4. Michaelmas Terme beginneth the 9 of October. (if it
be not Sunday) and endeth the 28 day of November: and
hath 8 Returnes.

Ostabis Michael	Craftino Animarum
Quind. Michael	Craftino Martini
Tres Michael	Ostabis Martini
Mense Michael	Quind. Martini

In this my Calender following, you shall find both the
beginnings and endings of the Termes, & at their Returnes
set downe vpon the dayes of the month that they fall vpon.
this year, 1630.

Vulgar Notes of	
The Italian, Soligenian, or English account for this year,	The Lillian, Gregorian, or Roman account for this year,

mihi hebdo, 6. dierum 5.
Dominica post Trinitatis. 26.

Charles our Soueraigne King, did begin his reigne ouer
Great Brittain, Anno 1625. March the 27. & hath reigned
5 yeres & compleat this year 1630. March. 26.

Veneris stella à Græcis, *πρωτοστος* & *ἑσπερος* à nostris
Lucifer ac vesper vel vesperugo nuncupatur.

This Golden Planet Venus is Occidentall, from the begin-
ning of this year, to the 25 day of Aprill following, so long
she is called the glittering Euening Starre, setting after the going
downe of the Sunne, and therefore termed *Esperos* vel *Vesperus*:
that is the Euening Star, continuing so long

And on the 26 of Aprill she beginneth to be Orientall and to
rise before the Sunne, and thereof called *Lucifer*: and our bright
and glittering Morning Starre, vnto the end of the yeere.

**A most plain and easie Table shewing the true
time of the beginning, continuance, and yeares, since
the reigne of each King & Queene in this Land, from the
Conquest, vntill this yeare, 1630. Gathered forth of
Chronicles, and heretofore set forth by others
for profitable vse.**

The Kinges names.	Began they reigne.	The time they reigned.	Since they reigne.

	After Septuages.		
	Ascension day,		
		¶	8. dayes af. East.
			Trinity Sunday

All the Aspects of the Planets, with their Characters and Definitions.

1 The Coniunction is, when 2 Planets are both in one selfe-sign, & one selfe-degree of the Zodiack: which Aspect in Greeke is named Synodos, and marked thus, \cup .

2 The Sextill Aspect, is when 2 Planets are distant one from another, betwene the centures of their owne bodies, by a sixt part of the Zodiack: that is, by 2 whole signes, or 60 degrees, which Aspect is called in Greeke Exagonos, and is marked thus \ast .

3 The Square Aspect, is when 2 Planets are distant the one from the other 3 whole signes, or 90 degrees: which Aspect is called in Greeke Tetragonos, and is marked thus \square .

4 The Trine Aspect, is when 2 Planets are distant the one from the other by 4 whole signes, or 120 degrees of the Zodiack, and is called in Greeke Trigonos, and is marked thus \triangle .

5 The Opposition, is when 2 Planets are right opposite the one to the other, and are distant the one to the other by 6 whole signes, or 180 degrees of the Zodiack, and is called in Greeke Diametros, and is marked thus \circ .

In the 7. or last columnne of this my Almanacke toward the right hand, you haue the houre & min. of the sun rising for euery day in the year, at London: which houres & min. are halfe the length of the same night. For example: the 5. of Ian. the Sun riseth at London at 8 of the clocke, & no min. the length being doubled, maketh 16. houres and no min. the length of that night. And to know the time of the Sun setting in the same place through the yeare, take the houres & minutes found in the Almanacke for sun rising from 12. and you shall haue the Sun setting left: which being doubled, is the length of that day. Example: Ian. the 5. day aforesaid, the sun riseth at 8. & no min. take 8. from 12. and there resteth 4 the houre of sun set that day, 4 being doubled, maketh 8. hours, the length of that day, and so of all the rest. This is very easie.

January hath xxxi dayes.

The dayes of the month.	Weekes dayes.	Festiuall dayes in vse for Law dayes, keeping of Faïres, &c.	The place of the ☉ she is in the Zodiak e- uery day at noone. Note that a stands for ante, or before noone, and p for post, or after noone.

February the Moone hath 29 dayes.

This Month of Feuers hath his appellation,
 Grosse humours causing Liuers oppilation:
 But bodies po'res are not so shut with cold.
 As Miser's purse that shrines his Idol golde.

March the Moone hath 30. dayes.

The Springs approach, renews the verdant Meades,
Refines the blood, and vitall spirits breeds:
Lament (ô man) because there is so few,
That doffe the old man, and puts on the new.

Mark Evan

Mense pasche

Aprill the Moone hath 29 dayes.

Tellus awakes from sleepe, and now is seen e,
 (In spite of Winter) clad againe in greene:
 Wake slugish man, least thou be taken napping,
 By Sathans Dormitiues, thy sense entrapping.

May the Moone hath 30. dayes.

Rise, and perambulate both farre and wide,
The fields embellished with Flora's pride,
With orient colours flowers content the eie,
And please the smelling sense abundantly,

June the Moone hath 29. dayes.

Phoebe high mounting in our Hemisphere,
Thence darts his beames, which fric our bodies here,
Bid Venus packe, for if thy mind be bent,
To lustfull sports, thou'lt die incontinent.

July the Moone hath 30 dayes.

Cold bathes, and cooling herbes are much comended,
 Till Dog-daies furious heate be fully ended :
 Honest householders toile in making hay ;
 But Foxes toiles, are alwayes for a pray.

September the Moone hath 29 dayes.

Now maist thou gather fruits, when time is fitting ;
 Now maist thou cate ripe Pearce-maine, & ripe Pippin:
 Fruit-bearing trees deserue to be manur'd,
 Ground-cumbring barren, must not be endur'd.

October the Moone hath 30. dayes.

Now quench your flagrant thirst with fragrant wine,
Both when you sup, and likewise when you dine,
Ingurgitate not too much, but keepe a meane;
For many draughts, will make a fat man leane.

November the Moone hath 29. d. yes.

With clothes keepe body warme, as hiues do Bees,
But warme it not too much with Tinkers frieze;
Which often makes ill Liuers, breeds Catarrhs,
And kindleth Sodaine flames of furious Iarrs.

December the Moone hath 30. dayes.

Defraud not now thy Genius, feast and play,
 Banquet, sans sursetting each holy day :
 Now winters cold, consuming store of Fewell,
 Thy bodies heat doth challenge to a Duell.

A Tide Table, whereby is easily found the time of full Sea, at the cheefest Ports, in and adioyning to this Kingdome.

For these places adde houres and minutes.

B Arwick, S. Mat. Font. Ostend, Blackenb.	0,45
Frith, Litch, Dunbar, Mouth, Egmo, Har. Silly.	1,30
Salmo, Garnsey, Ibalto. S. Malo, Cinby, Lizard.	2,25
Foy, waterford, Poghall, Corke, Kinsale.	2,25
Lin, Humber, Weymouth, Daren. Aune, Sale.	3,0
Montbray, Antwerp, Harboz. Bristol, Lamion, Fulnes.	3,0
Milford, Bridgwa. Exwater, North-coast of Engl.	4,30
Portla. Peterport, Harlew, Hag, Blanchey.	5,15
Orkney, Poole, S. Ellens at the fle, Emden.	6,0
Depe, Medles, Tasket, Lux, Lenoy..	6,45
Bullen, Douer, Harwi. Yarmouth, Liest. Wight.	7,30
Oxfordnes Northforthland.	7,30
Callice, Calthe t, Wyre, Winchester, Boze-ne	5,14
Land-end, Southampton, Dumborow, Portsmouth.	9,0
Willins, Flanders, Spits, the Slace, along the Swine.	9,0
But contrariwise for these subtract Hou. and Min.	
Redban. Aberdin, the west end of the Fore.	2,13
Gravel-end, Downes, Tenes, Ramney, Hankins.	2,30
Dundee, S. And:exes, Lisbon, S. Alcas.	0,45
Cunmo, Harlepo. Cadiz, Gascoigne, Brittain.	0,0
Biskay, Galizia, Portugall.	0,0

The vse of this Table is easily had, by adding or subtracting the houres and minuts from the time of the full-sea at London bridge, noted in the diarie of my Almanacke, in so doing it sheweth you the time of full-sea in all these places above noted : with this Caution, that Winds, Land-floods, the Moones Latitude, may bee an hinderance, or fortherance of the time, an houre more or lesse.

Allestree. 1630.

An Appendixe vnto the
Precedent Almanacke, for
this present Yeare of Grace.
M. DC. XXX.

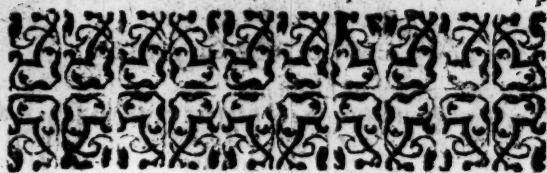

Wherein you may Obserue a
briebe Chronology of Yeares: A De-
scription of all the Ecclipses of the
Sunne and Moone, which are to be seene
this Yeare; with a Cælestrall Sheame of
the Ecclipse of the Sunne: Some Phy-
sicall notes; and notes of Husbandry,
and Gardning; with a Cronography
of the foure Quarters of this
Yeare.

Vsefull and pleasant for all those
which are desirous (and holds
not vnlawfull) of such a
Worke,

By *Richard Allestree.*

GOD maketh Lightning with Raine, and bringeth
forth the Wind out of his Treasures Iere. 10. 13.
Thus Nature is an Order prescribed, and set downe
by GOD too.

Euphe-

Euphemismus, or *Boni ominis*
Captatio. Also some Astronomicall
Calculations for this pre-
sent Yeare. 1630.

A Description of all the Ecclices
within this present Yeare of
Grace. 1630.

THE two great Luminaries, the Sunne and
Moone will suffer foure Ecclices this yeare
current: Two of the Sunne, and two of
the Moone, whereof both of the Moone, and
the first of the Sunne will be visible vpon our
Worlde in great Brittain; but the latter E-
clipse of the Sunne will be seene the 24. day of Nouem-
ber. according to our English accompt; but the 4. day
of December, according to the Romaine accompt, and
will offer it selfe towards the East Countreies and Meri-
dian in Magallanica vnder the Meridian of new Guyana:
the time apparant will be at one a clocke, and 30. min.
in the morning; but not to be seene in England.

The first Eclipse of the Moone will be very conspi-
cuous in England, Scotland, Ireland, France, Spaine, Ger-
many, and ouer all America: It will be objected to our
sights the 15. of May being Saturday, at 3. a clocke,
and 40. minutes in the morning, according to our Eng-
lish

A Prognostication.

lish accompt; but the 25. day of May according to the Romane: when as the Moone possessing the 4. degree, an 45. minutes of Sagitary, neere the Dragons tayle, and shall be opposite to the Sunne, neere one halfe of her Surface, to the quantity of 6. digits, so being encompassed in the shadow of the earth. Her middle or true opposition will be at 5. a clocke and 20. minutes in the morning, the end of her greatest darknesse at 6. a clocke. The totall duration will be 2. houres, 40. min.

The second Eclipse is of the Sunne, whose rayes are intercepted and regelled by the Opacous body of the Moone will seeme to be hidden from our sight, the 11. day of May, being A. noon. day, at 5. a clocke, and 41. minutes in the afternoon, according to our English accompt: but it will beginne the 10. day of June according to the Romane accompt; at which time hee will be seated in the 19. degree, and 37. minutes, 36 seconds of the ayrie signe Gemini, toynd with the Moone in the arabe signe; the digits Eclipsed are 9. and 7. minutes: the middle of this great Eclipse is at 6. a clocke, and 50. minutes, the end at 7. a clocke and 39. minutes. The totall duration will be one houre, and 38. minutes.

The third Eclipse is of the Moone, which will be seene vpon our Worlde on the 9. day of November, being Tuesday, the beginning whereof will be at 8. a clocke, and 44. minutes at night, according to our English accompt; the middest is at 10. and 27. minutes, the end of her darknesse at mid-night. The totall duration will be 3. houres, and 16. minutes. The digits Eclipsed are 9. 34. minutes, 50. seconds. The Moone not being farre at that time from the Dragons head, and in the 27. degree, and 35. minutes of the cold and earthy signe Taurus.

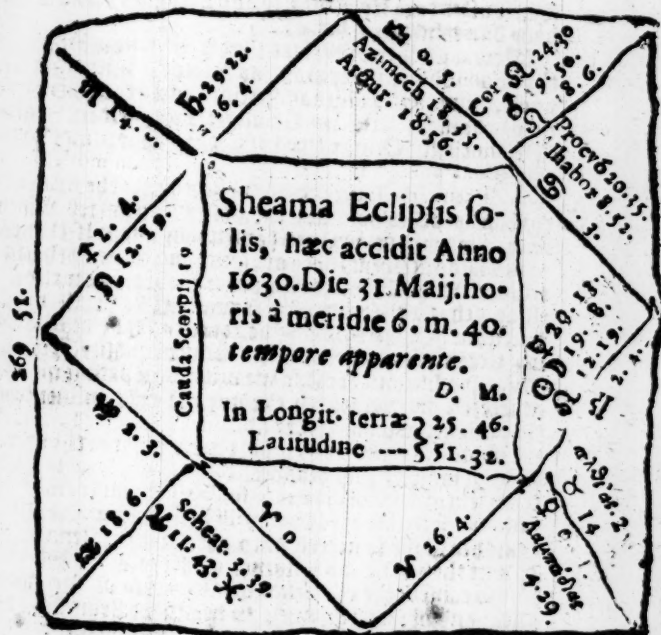

Allestree. 1630.

A Scheame, or Cælestiall figure of
the Eclipse of the Sunne the 30. day
of May, at 6. a clocke, and 50. min.

alter-noone, 1630. *Vt in
Schemate adiuncto vides.*

180. 2.

A Prognostication.

Some few *Physicall* Notes and Observations.

THIS World consisteth eyther of thinge Imvisible, as of Angels, and Spirits: or visible, as the Heavens, the Elements, and the bodies composed of the Elements. So then (if the foure humours do exceede or alter that proportion in mans body (that God created them at the beginning, either in quality, or quantity, then shortly after cometh diseases and sicknesses, and so the body decreaseth.

Wee may assure our selves that it is true, and that the Moone hath under God, as a second instrumentall cause, superiority and domination vpon the foure humours of mans body, as Choller, Blood, Fleame, and Melanocholly: Doctor Dee in his 103 Aphorisme, sayth thus: Luna potentissima est humidatum rerum moderatrix humiditatisq; excitatrix & effectrix. So that the best doctors do hold this opinion, that all the infirmities which naturally come to any man (and not by any mischance, or suddaine accident) doth proceede and come by the distemperance of the foure humours: so wee may well conclude, that it the head of a Fountaine doth alter his course, or be infected, then the adiacentcalk, or belonging streames must needs differ either in quality, or quantity. So likewise the Moone being of a passive quality collecteth and receiveth the good or evil influence of that Planet to whom she is adioyned or applyed, as well the Sunne, as wee see by prooffe euery night in the yeare, As that famous Philosopher Hermes sayth in his Astronomathematickes: Lina vero stella (sive benifica sive maligna fuerit) vtri se applicuerit, illi suffragabitur. And because her Orb is nearest vnto the earth shee lendeth vs downe the vertue and influence of all the other Planets and so causeth the mutation or alteration of the Weather: and of mens bodies, to health or sickness, this or that, according to the nature of the Planet, with whom shee is adioyned or configurated, and the part of

of the Todblacke wherein she is situated. Dicit Hippocrates, quod medicus primo aspiciat Luna, quando est plena lumine, quia tunc crescit sanguis & medulla in omni homine & medulla in bestijs omnibus, & augmentem in Mari, & in cunctis mundanis rebus. And Aristotle saith, Dens & natura nihil agunt frustra: God and nature hath done nothing in vaine. And I will giue one reason more, if any thing vpon the earth, reasonable, sensible, or naturall, were of one Element alone: So sicknesse could hurt it, nor disease corrupt it, but euery compounded liuing thing vpon the earth, seeing it hath had a beginning of the foure Elements, it must needes of necessity dye.

These words before written, doth not frustrate the words of the Holy Ghost, spoken to Adam: In that day that thou eatest thereof, thou shalt dye the death. Nor these words: The same soule that sinneth, shall dye. Where the efficient cause of Death, I faithfully beleue is sinne. The afore-sayd, evidently teacheth, that we may take an occasion lawfully vpon this matter, to come to the true Astronomy, and Astrology of Christians, which is to contemplate the glory, infinite power, wisdom, goodnesse, mercy, and loue of our Almighty God by his great worke of the Heauens. The Heauens declare the glory of God, and the earth sheweth the worke of his hands, &c. We are not as the Heathen, or the Stoickes, that beleue in the Planets, and taketh them for their Gods, and trusteth in them. The afore-sayd things being well considered, as they are layd in vaine. Let Physicke and Astronomie be ministred on such dayes, and aspects of the Moone with the Planets as followeth, if you can know when they be. But aboue all remember this: Medicus sostrum requirit: That is, when the Physicion is not payd, the disease goeth backe-ward.

If therefore you desire to helpe, strengthen, or comfort the Vitall, or liuely power, whose seate is in the heart, you must vse things temperately hot and drye, or hot and moist, and at such time as the Sunne is strong, and well affected with the friendly beames of Iupiter and Luna.

The naturall Vertue gouerned by Iupiter, Venus, and Luna, and seated in the Liuer, wherein are ingendered the foure humors (spoken of before) and is fortified

A Prognostication.

fortified especially by Iupiter in vsing hote and moyst things, at such times as Iupiter is well disposed in the Horoscope, or configured with Venus, and the Moone being fortunate

The animall Vertue distinguished into the intellectuall part which Mercury governes, is the sensitive which the Moone with Iupiter and Venus doe rule, and is best comforted vnder the afore said Planets well disposed, and with medicines temperate, and agreeable to their natures.

The Vertue tractiue (one of the foure lesse principall and subseruing vertues) reioycing in the heate and drynesse, and is fortified by things of hote nature, the Moone passing vnder Aries, and Sagitary, and well aspected of Sol, or Mars fortunate, or the Moone in any other signe so aspected, and Aries, or Sagitary ascending in Domo vita.

The Vertue retentive delighteth in colde and drye things by the influence of Saturne, and is best comforted, the Moone seated vnder Taurus, Virgo, or Scorpio, and applying with a friendly aspect vnto Saturne, or the moone in another signe so aspected, and eyther Taurus or Scorpio ascending in the East point.

The Vertue digestiue is best strengthened by heat and moysture and the influence of Iupiter, and is best holpen when the moone is vnder Gemini, Libra, or Aquary, and aspected of a friendly Planet, or if he be in some other signe, then it is fit that eyther Gemini, Libra, or Virgo, be rising in the ascendent.

The Vertue expulsiue delighteth in coldnesse and moystnesse, and that by the influence of the moone well aspected, and placed in Canero, Scorpio, or Piscibus, while one of these signes are ascending. One may medicine that is good agaynst womens, a day before and after the new moone: The like time vs for Cataplasmes.

These things are apparent enough to well qualified Philosophers, Physitians or Chyrurgeons to proue, that the Elements, Sunne, Moone, and Starres, are instruments, and secondary causes to worke vpon all compound bodies, vnder the orbe of the Moone. The Heauen cause the earth to fructifie, and the Clouds drops farnesse And the Philosophers saye: Causa causa est etiam causa causati.

Certayne.

Certaine brieft Rules for Husbandry,
Gardning &c. superstitiously attributed
to the Moone, moouing vnder the
12. Signes of the Zodiacke.

Salomon sayth : To all things there is an appoynted
time, and a time to euery purpose vnder the
Heauen.

And Astrologers say, before you plant or graft,
ec. consider the Wind for if it be in the North,
or East, it is perillous. And I say: for the plan-
ting, sowing, setting, feeding, and preserving
of sundry things, that places, and times of
different nature and quality, are to be chosen and ob-
serued : Non omnis fert omniatellus. And so the pre-
misses considered. you may plant, and graft the moone
increasing, in Tauro, Aquario, or Capricorno; (and
the best of all vpon Shrou-tuesday) Crescens enim
Luna humorem augeat & corpore implet : Decrescens mi-
nuat & exhaurit. Good to buy or sell Cattle, when the
signe is in the Head, Thighes, or Knees. Good to
sow or set all kinde of Corne, and Seedes, the moone
being Extra impedimentum, in the Head, Neck, Belly,
Reines, or Knees: The moone in Tauro, Virgo, or
Capricorno, and in ♄ aspect of Saturne. To
sow or plant in Gardens, or cast into the ground, to
Digge, Plow, or Delue, and to drille your Vines, if
you sow in moyst ground, or the nature of your Seedes
be moyst. the times best after the full moone, it is bee-
dyne, it is best in the increate : But the Seedes whose
rootes be round must be sowne as Onions, Cabbages,
or Turneps. ec. three or foure dayes before or af-
ter the full moone.

Gather Apples and other Fruits, Hearbes, and
Flowers, to haue them in most beauty, and greatest
Vertue, the moone at the full. Sow or set Garlick, &
Lettice, Parsneps, Carrets, Pease, and Beans, two
dayes before or after the full moone. Satt feedes, or
hearbes for stoz, in the increate, from February vnto
Iune.

Allestree. 1630.

A Cronography of the foure Quarters
of this Yeare. 1630.

1. Solstitium Hyemale: The stay of the Sunne in Winter, or the beginning of our Winter Quarter, according to Astronomy, entered the last yeare 1629. December the 11. day, 45 min. 55. seconds after-noon, (but more naturally in this our Northerne climate, about the midst of November,) at what time the Sunne entered into the first minute of the imaginary cold and drye signe Capricorne, at what time with vs, the dayes are at the shortest, and the nights at the longest in all the yeare. The beginning of Ianuary, some floze of met is like, and at the latter end great winde; and but a little Frost in February.

2. Aequinoctium Vernum: Of our Spring Quarter, beginneth Astronomically the 10. day of March, at 1. a clocke, 10. min. 29. seconds, in the after-noon; and endeth the 21. of Iune following, (but more naturally with vs about the 8. day of February.) There is like to be some floze of showers, and some lightning and thunder in the latter end of March. About the 13. 14. and 15. of Aprill, is like to be some cold raine, and haille, and so also about the 28. and 29. dayes of the same; but the fragrant moneth of May is like to be very windy.

3. Solstitium Aestivum: Of our Summer Quarter according to Astronomy, beginneth the 11. day of Iune, at 5. a clocke, 18. min. 40. seconds in the after-noon: at what time the restlesse Sunne entreth the first minute of the backe-ward mooning Cancer, making our longest day, and shortest night with vs (heare in England) in all the yeare; but more naturally about the midst of May. At the afore-sayd houre and minute, the Sunne beginneth to make his South declination, and to be mounted vp to his highest Zenith of his ascendent. Much troubled dayes in Iune, the Eclipses this Yeare are like to stirre vp or prouoke great Windes; crash and very much flye cornell. Periculo in itineribus affert, and especially vpon the Seas: But Plato commandeth me here to hold my peace. Like to be much raine in the latter end of Iuly, and beginning of August.

4. Augu-

A Prognostication.

June. Good to fell Timber for building, in the wane of the moone, for the auoyding of Stormes, from Midsummer vntill Iaguary.

Good to plash hedges, fell wood to burne, that the Stockes may the better grow againe, the moone increasing in Ariete, or Libra. Cut Vines in February, or March, the moone in Ariete, Tauro, or Libra.

Remooue Trees in the same Signes all the last quarter, in Nouember, September, or February. Dug your Land, that the weedes may not abound, in the last quarter. The moone in Libra, or Aquario, is good to rill the Gardens, and also to sow or set it, to set plants, and also to make a Voy-yard, or to set Voy-poles. Kill fat Swine neere the full moone, for the fat, the better to indure the boyling.

Good for ablactions, or weaning of Children about the full moone, or the moone Vac. curs. to make them the more willing to forget the Paps, or Nipples.

Hee that is cast into Prison, or shall fall into any sicknesse, or bee sore wounded, the moone being in Tauro, Leone, Scorpione, or Aquario, hee is not like soone or easily to come forth, recover, or bee healed. A promise made will not lightly be kept, and rumours brought first to ones eare. When the moone mooueth vnder Aries, Cancer, Libra, or Capricornus, will commonly prooue false. Dei igitur altissimi cælum instrumentum, quo inferioro agit agit, impellit, regitq. For my part, I doe attribute nothing to Time, Starrs, Aspects, and foure Elements; but all Honour, Praise, and Glory to the Almighty, that made them all; and do vse them like as masters of Physicke, and Surgeons, or rather Chyrurgions do their Apothecary Drugges, medicines, and Cataplasmes: For when they vse them to their Patients, they are not sure that they will take effect: Neither do we or they say, this shall come to passe, or that medicine shall take effect. And both they and we for ought that I know, do deale with nothing else, but by Gods direction, and with his naturall and good Creatures. I do know, and also doe beleue, that Almighty Gods gouernement of the Heauens, Starrs, and Elements, taketh not away the lawfull vse and meane of this secondary causes, instruments, and good Creatures. (as some would haue it) but they may stand euer together to the worlds end.

A Prognostication.

4. Autumnall Equinoctiall, our Autumn, or Harvest Winter, beginneth Astronomically the 13. day of September, at 7. a clocke, 50. minutes, and 20. seconds in the morning, (but more naturally beginneth about the 15. day of August.) This second winter Equinoctiall, endeth upon the 11. day of December. Take heede of a great Deluge or Flood about Michaelmas, for it will doe you no good: Likens like to be a very great inequality of the ayre, and very much inconstancy and alteration of the weather, with many allinfractons of qualities: much halie and darke weather, and some thunder about the 22. 23. and 24. dayes of October, and so likewise about the 6. and 7. dayes of November: also much cold raine the 15. 16. 22. and 23. dayes of the same moneth.

Soli Deo sit gloria.

An Abstract of a Direction, concerning Reall Contracts.

WHosoever shal desire to purchase, or put to Sale, to take in Lease, or let to Farme, to Grant, Assigne, Exchange, or otherwise to Contract, or Deale, with or for any Lands, Leases, Rents, Annuities,

quities, Manton Houses, Offices,
saleable, or other Estates of what
Ye:ely value soever, or to save any
such from danger of Forfeiture, tho:
ugh the want of present mony. May
either in their owne names, or in the
name of any other trusted by them,
haue secure meanes with all priuacy
required, for the speedy effecting what
shall be desired, in any the Cases afore-
sayd, or the like. At the Porcht-
houle against Saint *Andrewes*
Church in *Holborne*. LONDON.

God save our gracious King *Charles*.
